

# Exact™ 5371

# Ethylene-based Plastomer Resin

## **Product Description**

Exact<sup>™</sup> 5371 plastomer resin is an ethylene 1-octene copolymer produced using a proprietary metallocene technology. It exhibits outstanding plastic and elastomeric properties including superior toughness. Exact<sup>™</sup> 5371 is designed for modification of polypropylene and polyethylene in a wide range of applications such as injection molding, extrusion blow molding, blown and cast film, and profile extrusion.

## **Key Features**

- Premium low temperature impact modifier
- Free-flowing pellets
- Superior toughness and tear strength

General  Availability <sup>1</sup>	<ul> <li>Africa &amp; Middle East</li> </ul>		<ul> <li>Europe</li> </ul>	North A	∆merica
, wandonie,	Asia Pacific		Latin America	- North America	
	<ul> <li>Compounding and TPO</li> </ul>		<ul> <li>Injection Molding</li> </ul>	<ul> <li>Shoe sole, foam, and footweam</li> </ul>	
	<ul> <li>General purpose elas</li> </ul>	stomer	<ul> <li>Polymer Modification</li> </ul>		
Form(s)	<ul> <li>Pellets</li> </ul>				
Revision Date	• 10/22/2020				
Physical	Typical Value	(English)	Typical Value	(SI)	Test Based On

## Exact<sup>™</sup> 5371 Ethylene-based Plastomer Resin

#### Legal Statement

Contact your ExxonMobil Chemical Customer Service Representative for potential food contact application compliance (e.g. FDA, EU, HPFB).

This product is not intended for use in medical applications and should not be used in any such applications.

#### **Processing Statement**

Tensile testing was conducted at a crosshead speed of 20 in/min.

Physical properties were measured on compression molded specimens.

#### Notes

Typical properties: these are not to be construed as specifications.

- <sup>1</sup> Product may not be available in one or more countries in the identified Availability regions. Please contact your Sales Representative for complete Country Availability.
- <sup>2</sup> All specimens reached extension limit, did not break.
