# Santoprene™ 8211-75 Thermoplastic Vulcanizate

Product Description		Key Features					
A soft, colorable, non-hygroscopic thermoplastic vulcanizate (TPV) in the thermoplastic elastomer (TPE) family. This material combines		<ul> <li>Non-hygroscopic product, requires little to no drying before processing</li> </ul>					
good physical properties and chemical							
injection molding applications. This gra	ade of Santoprene TPV is						
shear-dependent and can be processe	d on conventional						
thermoplastics equipment for injection	n molding or blow molding. It	<ul> <li>Recommended for applications requiring excellent flex fatigue</li> </ul>					
is polyolefin based and recyclable with	in the manufacturing stream.	resistance. • UL listed: file #QMFZ2.E80017, Plastics - Component; file					
		#QMFZ8.E80017, Plastics Certif	ied For Canada - Component.				
General		_

Vent Depth	1.0E-3	in	0.025	mm	

#### Injection Notes

Santoprene<sup>™</sup> TPV is incompatible with acetal and PVC. For more information regarding processing and mold design, please consult our Injection Molding Guide.

Aging	Typical Value	(English)	Typical Value	(SI)	Test Based On
Change in Tensile Strength in Air					ASTM D573
302°F (150°C), 168 hr	-17	%	-17	%	
Change in Tensile Strength in Air					ISO 188
302°F (150°C), 168 hr	-17	%	-17	%	
Change in Ultimate Elongation in Air					ASTM D573
302°F (150°C), 168 hr	-39	%	-39	%	
Change in Tensile Strain at Break in Air					ISO 188
302°F (150°C), 168 hr	-39	%	-39	%

0.12 in (3.0 mm)	HB		HB		

#### Additional Information

Where applicable, test results based on fan gated, 2.0 mm injection molded plaques. Tensile strength, elongation and tensile stress are measured across the flow direction. Test results are generated by ExxonMobil test methods that may not fully conform to the ASTM and/or ISO methods. Test methods are available upon request. Compression set at 25% deflection. Not recommended for hot oil. All products purchased directly from an ExxonMobil affiliate in Europe are REACH compliant. For products not imported into Europe by ExxonMobil, customers should assess their legal responsibilities under REACH.

#### Legal Statement

This product, including the product name, shall not be used or tested in any medical application without the prior written acknowledgement of ExxonMobil Chemical as to the intended use. For detailed Product Stewardship information, please contact Customer Service.

For detailed Product Stewardship information, please contact Customer Service.

## **E**‰onMobil

#### **Processing Statement**

Desiccant drying for 3 hours at 80°C (180°F) can be performed if desired. Santoprene TPV has a wide temperature processing window from 175 to 230°C (350 to 450°F) and is incompatible with acetal and PVC. For more information, please consult our Safety Data Sheet and Injection Molding Guide.

#### Notes

Typical properties: these are not to be construed as specifications.

<sup>1</sup> Product may not be available in one or more countries in the identified Availability regions. Please contact your Sales Representative for complete Country Availability.
